

KARTIK SINGH

Full Stack Developer | React | Node.js | JavaScript

+91-7500379410 | [✉ kartiksingh379410@gmail.com](mailto:kartiksingh379410@gmail.com) | [in https://www.linkedin.com/in/kartik-singh-359766238/](https://www.linkedin.com/in/kartik-singh-359766238/) | [gh https://github.com/kartiksingh37-arch](https://github.com/kartiksingh37-arch)

Summary

MCA student with hands-on experience in Full Stack and Web3 development using React, JavaScript, Solidity, Hardhat, Ethers.js, Built and deployed decentralized applications on Ethereum, including smart contracts and Web3 frontends integrated with MetaMask. Strong foundation in Data Structures Algorithms, DBMS, Operating Systems, and Computer Networks with a passion for building scalable software and blockchain solutions.

Skills

Programming Languages: C, C++, JavaScript (ES6), Solidity

Frontend Development: React, HTML, CSS

Blockchain / Web3: Ethereum, Solidity, Smart Contracts, Hardhat, Ethers.js, OpenZeppelin, MetaMask, Sepolia

Tools: Git, GitHub, VS Code, Remix IDE, MetaMask, Vercel

Soft Skills

Problem Solving | Quick Learner | Team Collaboration | Communication

Projects

Crypto Market Dashboard | *React, Vite, API, Vercel*

Dec 2025 – Jan 2026

- **Live:** cryptodash1.vercel.app
- **GitHub:** github.com/kartiksingh37-arch/cryptodash1
- Built a real-time cryptocurrency dashboard using React with data from CoinGecko API
- Implemented dynamic search and displayed key metrics like price, market cap, and 24h change
- Designed responsive UI and deployed using Vercel with CI/CD integration

Crowdfunding DApp | *Solidity, Hardhat, React, Ethers.js, MetaMask, Sepolia, Vercel*

May 2026 – Jun 2026

- **Live:** crowd-funding-dapp-rose.vercel.app
- **GitHub:** github.com/kartiksingh37-arch/CrowdFundingDAPP
- Built and deployed a decentralized crowdfunding platform on Ethereum Sepolia Testnet using Solidity smart contracts and Hardhat.
- Implemented MetaMask wallet integration and blockchain transactions using Ethers.js for seamless Web3 interactions.
- Developed campaign creation, campaign details, ETH donation, withdrawal, funding progress tracking, and donor history features.
- Designed immutable smart contract logic by implementing campaign cancellation functionality instead of deletion.
- Built a responsive React frontend and deployed the application on Vercel with live smart contract integration.
- Gained hands-on experience in smart contract development, Ethereum transactions, Web3 frontend integration, and blockchain application architecture.

Certifications

- **Ethereum Blockchain Developer Bootcamp with Solidity** – Udemy
- **JavaScript Fundamentals** – Online Course

Education

Master of Computer Applications (MCA)

2025 – 2027

Lovely Professional University, Phagwara

CGPA: 8.2

Bachelor of Computer Applications (BCA)

2024

Graphic Era Hill University, Haldwani

CGPA: 7.48 / 10

Intermediate (12th)

2021

Adarsh Bharti I.C. Banusi, Khatima

Percentage: 80.20%

High School (10th)

2019

Alchemist Academy Khetal Sanda, Khatima

Percentage: 80.00%
